The **ASHVINS Group** presents "StaffingScore" at a meeting associated with eMerge Americas, the premier technology event connecting North America, Latin America and Europe.

MIAMI FL. USA – April 24, 2018. The ASHVINS Group, Inc. presents StaffingScore at a meeting associated with eMerge Americas. StaffingScore is a new product in the Temporary Staffing and Recruiting Industry that targets a specific pain point in the IT segment - the quality of service provided by IT contractors. StaffingScore is an online system providing 360° performance evaluations for IT contractors. Clients, supervisors, peers and subordinates can evaluate a contractor's performance in critical areas. StaffingScore is the only system available today that tracks the performance of temporary workers from job to job. StaffingScore also offers "StaffingScore™ Reports" to help employers identify high achievers and to reward outstanding IT contractors by documenting high performance. Checking references is an outdated and ineffective process to verify a candidate's work performance; StaffingScore addresses this problem by offering reports that summarize performance from those working closest with the contractor.

StaffingScore's mission is to improve the process of connecting employers with high performing temporary IT personnel. "StaffingScore helps those looking for temporary IT resources to identify high achievers. And StaffingScore helps the best IT contractors market their skills using online evaluations and performance reports.", said President/CEO, Lynn Hilt. "Contractors can create profiles, invite others to complete reviews, respond to performance evaluations and send posts to their client base."
