

The ASHVINS Group participates in a roundtable discussion associated with the annual exhibit of the Healthcare Information Systems Society (HIMMS), March 2008.

PRESS RELEASE

HIMSS e-Health Technologies Roundtable Discussion

The ASHVINS Group, Inc.

Technology Professionals

<http://www.ashvinsgroup.com>

MIAMI FL. USA – March 10, 2008. Lynn Hilt, President and CEO of **The ASHVINS Group, Inc.**, an Information Technology consulting firm focused in medical and life science industries, was a panel participant in a roundtable discussion of the expanding role of IT to establish e-Healthcare as a routine process for disease management.

The ASHVINS Group has experience developing and implementing web enabled applications that facilitate personalized monitoring services for disease management and e-visits to healthcare providers (HCPs). They have completed projects in the area of diabetes; developing applications that connect HCPs and patients to remotely monitor glucose levels and insulin delivery. Their development experience includes wireless connections, Bluetooth and IR medical device interfaces and HL7 standards. **The ASHVINS Group** works with medical device manufacturers to develop data analysis applications that allow HCPs to share critical data in order to monitor and improve medical outcomes. The applications include direct connectivity to medical devices, intuitive user interfaces and graphical displays for patients combined with complex reporting features for HCPs.

ABOUT ASHVINS GROUP

The ASHVINS Group, based in Miami, FL, is an IT systems development firm specialized in software development for medical and clinical based industries. They work with clinical organizations to augment development teams for custom application and healthcare platform development. **ASHVINS'** Technology Professionals support full life-cycle development including data collection, data analysis, database development, laboratory automation, and systems interfaces to medical devices and LIS/LIMS. The company is skilled in software development, validation and compliance processes for FDA regulated environments including HIPAA compliant applications.

The ASHVINS Group offers clients a synergistic approach to Project Management that combines experience in Medical Industries with IT development expertise. Areas of technical expertise include web based systems, Windows operating environments and wireless technologies. Visit the web site at www.ashvinsgroup.com for a summary of typical projects.
